

Sensor List

Aborted Jobs

Monitors the number of aborted Backup Exec jobs.

BackupExec Log

Scans the most recent Backup Exec log for errors and creates a message event based on contents of the log.

BackupExec Process Resources

Checks if Backup Exec processes are using significant resources.

BackupExec Services

Monitors the state of the Backup Exec services.

Corrupt Objects

Monitors the percentage of objects (files, Exchange objects, databases, etc.) being backed up that the Backup Exec engine reports as being corrupt.

Failed Jobs

Monitors number of failed Backup Exec jobs.

Failed Object Verification

Monitors the percentage of objects (files, Exchange objects, databases, etc.) being backed up that the Backup Exec engine was unable to verify.

Infected Objects

Monitors percentage of objects (files, Exchange objects, databases, etc.) being backed up that the Backup Exec engine's virus scan reports as being infected.

Skipped Objects

Monitors the percentage of objects that were skipped due to being in use or an error opening the object.
