

Solution: Insight Manager

Description:

The Longitude HP Systems Insight Manager (HP SIM), solution provides comprehensive out-of-the-box monitoring for your HP hardware. Longitude proactively monitors key hardware metrics to ensure that your environment is running optimally and alerts you when there is a problem.

Rule	Description
Ism_SysBatteryStatus	Monitors the condition of the system batteries.
Ism_ClusterNodeCondtion	Monitors the condition of individual nodes of a cluster.
Ism_ClusterResCondtiion	Monitors the overall condition of the remote insight board.
Ism_ServiceNotRunning	Monitors the services associated with the Compaq Insight Manager.
Ism_CritLogErrs	Monitors the Insight Manager Critical Error Log for new entries.
Ism_DriveProblems	Monitors for drive errors and problems
Ism_FltToIFanStatus	Monitors the status of individual fault tolerant fans on the server
Ism_FltToIPowerSupplyStatus	Monitors the status of individual fault tolerant supplies on the server
Ism_ResPerfCondition	Checks for high values on some basic performance indicators such as percent of time the CPU is busy, the file system read/write rates, the bytes transfer rate for the file system read/write operations and the percent of physical memory used
Ism_Status	Monitors many status conditions
Ism_TemperatureStatus	Monitors the status of individual temperature sensors on the server
