| Solutions: | Windows |
|---|---|
| Versions supported: | Windows XP, Vista, 7, 8, 2000, 2003, 2008, 2012, 2016 |
| Description: | The Longitude Windows solution provides comprehensive out-of-the-box monitoring for your heterogeneous environments. Longitude proactively monitors key performance metrics to ensure that your environment is running optimally and alerts you when there is a problem. Longitude also provides pre-configured, on-demand reports and graphs of key performance metrics to help you proactively take action and ensure maximum availability. |

| Rule | Description |
|---|---|
| Win_CpuBusy | Reports when the system CPU percent is high. |
| Win_Disk | Reports disks with a high busy percentage or low free space |
| Win_DiskIO | Reports disks with a high queue length |
| Win_DiskStatus | Reports on the status of the disk drives |
| Win_LowFreeMemory | Reports when the system is low on free memory. |
| Win_PageRateHigh | Reports when the system is experiencing a high page read and write rate. |
| Win_HighNetwkInputPckts | Reports network interfaces with a high input packet rate. |
| Win_HighNetwkOutputPckts | Reports network interfaces with a high output packet rate. |
| Win_HighNetworkInputErrs | Reports network interfaces with a high input error rate. |
| Win_HighNetworkOutputErrs | Reports network interfaces with a high output error rate. |
| Win_PrintQueueJobErrs | Reports job errors in the print queue. |
| Win_PrinterState | Reports a printer status that is neither running nor idle. |
| Win_HighCpuProcesses | Reports processes which are using a large percentage of the CPU. For multiprocessors, the rule will divide the total cpu percentage used by the number of processors |
| Win_ServiceNotRunning | Reports when a service has a Start Mode of 'Auto', 'Boot' or 'System' but is not running. |
